

Build your family's takeout planner with AI.

Two copy-paste prompts. No coding. No tech skills. A real working app filtered to your dietary needs, synced with your partner, built in one afternoon.

- Daily deal tracker
- Health filtering
- Partner sync
- Chat shortcut

This kit gives you **two prompts** to paste into Claude. The first builds a full interactive app tracking local restaurant deals, filtered to your household needs and synced with your partner. The second creates a shortcut so you just type **"I feel like takeout"** and get today's deals in seconds. Each prompt shows a filled-in example alongside a blank template for you to customize.

BEFORE YOU START

How to use this kit

Three steps. That is it.

- 1 Go to **claude.ai** and start a new chat. A free account works fine.
- 2 Copy the prompt, **fill in your details** where you see blank or italic fields, then paste it in and hit send.
- 3 Claude will **search your local restaurants**, look up real current deals, and build your personalized app with no coding needed.

PROMPT ONE

Build the Takeout Planner app

Builds a full interactive app with daily specials, health filtering, two household profiles, and a partner-sharing system. Claude researches your restaurants first so the deals inside are real, not made up.

EXAMPLE — MEERA & DIEGO, MISSISSAUGA ON	YOUR BLANK TEMPLATE
Build me a Smart Takeout Deal Planner app for my household. Location: Mississauga, ON — L5B 3C9 Radius: 10km Profile 1 — Meera: Vegetarian, no eggs. Flag anything with meat, fish, or gelatin. Prefer paneer, lentils, chickpeas, and tofu. Profile 2 — Diego: No restrictions. Not a fan of very spicy food. Note: We have two kids under 4. Quick, convenient options preferred. Restaurants near us: Freshii, OPA! of Greece, Pita Pit, Edo Japan, Domino's, Mary Brown's, Popeyes, Subway, Harvey's, barBURRITO, A&W, Osmow's Features I want: - Daily specials Mon to Fri, auto-set to today - Two profiles, one-tap switcher - Green, amber, red health scoring - Partner sync via Space code - Add new restaurants manually - Seq 1: Best Value / lowest price - Seq 2: Health-Conscious picks Design: Clean, minimal, mobile-friendly Research actual current deals before building. Use React and Tailwind CSS.	Build me a Smart Takeout Deal Planner app for my household. Location: <i>[your postal code or city]</i> Radius: <i>[5km / 10km / 15km]</i> Profile 1 — [your name]: <i>[dietary restrictions, e.g. no beef, no pork, low cholesterol, vegetarian, gluten-free. Or write: no restrictions]</i> Profile 2 — [partner name]: <i>[their restrictions, or: no restrictions]</i> <i>[optional: add a household note, e.g. kids, speed of meal, etc.]</i> Restaurants near us: <i>[list takeout spots near you. Claude will search their deals automatically.]</i> Features I want: - Daily specials Mon to Fri, auto-set to today - Two profiles, one-tap switcher - Green, amber, red health scoring - Partner sync via Space code - Add new restaurants manually - Seq 1: Best Value / lowest price - Seq 2: Health-Conscious picks Design: Clean, minimal, mobile-friendly Research actual current deals before building. Use React and Tailwind CSS.

PROMPT TWO

Build your daily chat shortcut

Creates a personal instruction set Claude remembers. Skip the app entirely: just message Claude naturally and get today's deals in seconds, filtered to your profile.

WHAT THIS UNLOCKS

Just say the word. Any of these messages triggers a live deal check for today, filtered to your dietary profile, no app needed.

"I want takeout"

"I feel like Greek"

"what are the deals today"

"I'm craving paneer"

"dinner tonight"

"Diego's picks"

EXAMPLE — MEERA & DIEGO, MISSISSAUGA ON

Build me a personal takeout deal checker. Here is my setup:

Location:

Mississauga, ON — Eastern Time

My profile (default) — Meera:

Vegetarian, no eggs. Flag anything with meat, fish, or gelatin. Prefer paneer, lentils, chickpeas, and tofu.

Partner profile — Diego:

No restrictions. Show everything.

My restaurants and known deals:

Freshii: veggie bowl special \$8.49
OPA! of Greece: falafel wrap deal \$7.99
Pita Pit: veggie pita \$7.49
Edo Japan: veggie teriyaki bowl \$9.99
Domino's: veggie pizza Tuesday \$9.99
Mary Brown's, Popeyes, Subway, Harvey's, barBURRITO, A&W, Osmow's

Rules:

- Check live date in Eastern Time before every reply
- Default to Meera's profile
- Switch to Diego's view only when I say "Diego's picks"
- Brief replies: deal, price, one health note max
- If my craving has no specials today, suggest what does

YOUR BLANK TEMPLATE

Build me a personal takeout deal checker. Here is my setup:

Location:

[your city and time zone]

My profile (default) — [your name]:

[dietary needs, or: no restrictions]

Partner profile — [partner name]:

[their dietary needs, or: no restrictions]

My restaurants and known deals:

[list your local restaurants. Include any deals you know. Claude will research the rest.]

Rules:

- Check live date in [time zone] before every reply
- Default to my profile
- Switch to partner's view only when I say "[name]'s picks"
- Brief replies: deal, price, one health note max
- If my craving has no specials today, suggest what does

PRO TIPS

Get the most out of it

Let Claude research first

List your restaurants and Claude searches for current specials before building. The deals inside are live and accurate, not made up.

The Space code syncs everything

Tap the share icon to get a 6-character code. Your partner enters it on their device and you're instantly synced, favourites and all.

Add restaurants anytime

The app has an Add Restaurant button. Use it for local spots Claude missed. Add their deals, health score, and avoid tags yourself.

Weekends auto-switch

No weekday specials on Saturday or Sunday? The chat shortcut knows. It surfaces the best everyday picks from your restaurants instead.

Update deals yourself

Tell Claude in chat: "Update Freshii Tuesday to \$6.99" and it fixes the shortcut instantly. No rebuilding from scratch needed.

Works anywhere in Canada

Swap the location and restaurant list. Most major Canadian chains have location-specific weekly deals Claude can search for you.
